

# MR SOLUTIONS

## Case Study

### An eye for detail

Gerrell & Hard's detailed understanding of our client's unique culture and complex requirements enables us to rapidly deploy on assignments and quickly fill challenging vacancies.

MR SOLUTIONS is a world leader in MRI technology and a developer and manufacturer of the world's first range of commercial, superconducting, cryogen-free (dry magnet), benchtop MRI systems.

Like many of our clients, their requirements are very specific; candidates must possess a high degree of technical expertise and are often needed for short-term contracts. The Gerrell & Hard team built our relationship with MR Solutions by visiting them regularly to refine our understanding of their needs and their technical environment. We have been able to fill more than ten roles in the last few years.

We have gained an insight into the company culture which is particularly entrepreneurial and hands-on, and thanks to MRS's generous sharing of their culture, we have consistently been able to identify the right kind of candidate for the business.

*"We have worked alongside Gerrell & Hard for over 5 years now and find their approach to our recruitment requests to be professional and attentive, specifically David Watts who has been our recruitment consultant from the start.*

*He has taken the time to really get to know us as a company and find out what it is we need to fulfil our roles. As a Magnetic Resonance Imaging company it can be hard to find the right person for the role as well as a consultant that understand our needs, particularly our specialist roles.*

*David will always send us CVs that you can tell he has carefully handpicked to meet our requirements, often offering guidance when we need it. We look forward to a continued successful relationship with David and Gerrell & Hard."*

**Nicky Doughty, CEO, MR Solutions**
