

ECS Policy for Employees and Contractors  
Dated March 2018

## 1. Introduction

1.1 This document sets out the measures to be taken by all employees of ECS Resource Group Ltd and by ECS as a whole in order to protect the computer systems, devices, infrastructure, computing environment and any and all other relevant equipment (collectively, "IT Systems") from damage and threats whether internal, external, deliberate or accidental.

## 2. Key Principles

- 2.1 All IT Systems are to be protected against unauthorised access.
- 2.2 All IT Systems are to be used only in compliance with relevant Company policies.
- 2.3 All data stored on IT Systems are to be managed securely in compliance with all relevant parts of the Data Protection Act 1998, the EU General Data Protection Regulation and all other laws governing data protection whether now or in the future in force.
- 2.4 All employees of ECS Resource Group and any and all third parties authorised to use the IT Systems including, but not limited to, contractors and sub-contractors (collectively, "Users"), must ensure that they are familiar with this Policy and must adhere to and comply with it at all times.
- 2.5 All line managers must ensure that all Users under their control and direction must adhere to and comply with this Policy at all times as required under paragraph 2.4.
- 2.6 All IT Systems are to be installed, maintained, serviced, repaired and upgraded by such third party/parties as the directors may from time to time authorise.
- 2.7 The responsibility for the security and integrity of all IT Systems and the data stored thereon (including, but not limited to, the security, integrity and confidentiality of that data) lies with the directors unless expressly stated otherwise.
- 2.8 All breaches of security pertaining to the IT Systems or any data stored thereon shall be reported and subsequently investigated by the directors and such third party/parties as the directors may from time to time authorise.
- 2.9 All Users must report any and all security concerns relating to the IT Systems or to the data stored thereon immediately to the directors.

## 3. IT Department Responsibilities

- 3.1 The directors shall be responsible for the following:
  - 3.1.1 ensuring that all IT Systems are assessed and deemed suitable for compliance with the Company's security requirements;
  - 3.1.2 ensuring that IT security standards within the Company are effectively implemented and regularly reviewed;
  - 3.1.3 ensuring that all Users are kept aware of the requirements of this Policy and of all related legislation, regulations and other relevant rules whether now or in the future in force including, but not limited to, the Data Protection Act 1998, the EU General Data Protection Regulations and the Computer Misuse Act 1990;
  - 3.1.4 assisting all Users in understanding and complying with this Policy;

- 3.1.5 providing all Users with appropriate support and training in IT security matters and use of IT Systems;
- 3.1.6 ensuring that all Users are granted levels of access to IT Systems that are appropriate for each User, taking into account their job role, responsibilities and any special security requirements;
- 3.1.7 receiving and handling all reports relating to IT security matters and taking appropriate action in response;
- 3.1.8 taking proactive action, where possible, to establish and implement IT security procedures and raise User awareness;
- 3.1.9 monitoring all IT security within the ECS and taking all necessary action to implement this Policy and any changes made to this Policy in the future; and
- 3.1.10 ensuring that regular backups are taken of all data stored within the IT Systems at timely intervals and that such backups are stored at a suitable location off the Company premises.

## 4. Users' Responsibilities

- 4.1 All Users must comply with all relevant parts of this Policy at all times when using the IT Systems.
- 4.2 All Users must use the IT Systems only within the bounds of UK law and must not use the IT Systems for any purpose or activity which is likely to contravene any UK law whether now or in the future in force.
- 4.3 Users must immediately inform the directors of any and all security concerns relating to the IT Systems.
- 4.4 Users must immediately inform the directors of any other technical problems (including, but not limited to, hardware failures and software errors) which may occur on the IT Systems.
- 4.5 Any and all deliberate or negligent breaches of this Policy by Users will be handled as appropriate under the Company's disciplinary procedures.

## 5. Software Security Measures

- 5.1 All software in use on the IT Systems (including, but not limited to, operating systems and individual software applications) will be kept up-to-date and any and all relevant software updates, patches, fixes and other intermediate releases will be applied at the sole discretion of the directors acting on advice from appropriate third party/parties. This provision does not extend to upgrading software to new 'major releases' (e.g. from version 1.0 to version 2.0), only to updates within a particular major release (e.g. from version 1.0 to version 1.0.1 etc.). Unless a software update is available free of charge it will be classed as a major release and thus falls within the remit of new software procurement and outside the scope of this provision.
- 5.2 Where any security flaw is identified in any software that flaw will be either fixed immediately or the software may be withdrawn from the IT Systems until such time as the security flaw can be effectively remedied.
- 5.3 No Users may install any software of their own, whether that software is supplied on physical media (e.g. DVD-Rom) or whether it is downloaded, without the approval of the directors. Any software belonging to Users must be approved by the directors and may only be installed where that installation poses no security risk to the IT Systems and where the installation would not breach any licence agreements to which that software may be subject.
- 5.4 All software will be installed onto the IT Systems by such third party/parties as approved and appointed by the directors unless an individual User is given written permission to do so by the directors. Such written permission must clearly state which software may be installed and onto which computer(s) or device(s) it may be installed.

## 6. Anti-Virus Security Measures

- 6.1 Most IT Systems (including all computers and servers) will be protected with suitable anti-virus, firewall and internet security software. All such anti-virus, firewall and internet security software will be kept up-to-date with the latest software updates and definitions.
- 6.2 All IT Systems protected by anti-virus software will be subject to a full system scan as frequently as the programmes require or recommend.
- 6.3 All storage media (e.g. USB memory sticks or disks of any kind) used by Users for transferring files must be virus-scanned before any files may be transferred. Such virus scans shall be performed automatically upon connection / insertion of media.
- 6.4 Users shall be permitted to transfer files using cloud storage systems. All files downloaded from any cloud storage system must be scanned for viruses during the download process.
- 6.5 Any files being sent to third parties outside the Company, whether by email, on physical media or by other means (e.g. FTP or shared cloud storage) must be scanned for viruses before being sent or as part of the sending process, as appropriate. All email attachments are scanned automatically upon sending.
- 6.6 Where any virus is detected by a User this must be reported immediately to the directors (this rule shall apply even where the anti-virus software automatically fixes the problem). The directors shall promptly take any and all necessary action to remedy the problem, if necessary with the assistance and guidance of appropriate third party/parties. In limited circumstances this may involve the temporary removal of the affected computer or device. Wherever possible a suitable replacement computer or device will be provided as soon as is reasonably practicable to limit disruption to the User.
- 6.7 Where any User deliberately introduces any malicious software or virus to the IT Systems this will constitute a criminal offence under the Computer Misuse Act 1990 and will be handled as appropriate under the Company's disciplinary procedures.

## 7. Hardware Security Measures

- 7.1 Wherever practical, IT Systems will be located in rooms which may be securely locked when not in use or, in appropriate cases, at all times whether in use or not (with authorised Users being granted access by means of a key, smart card, door code or similar). Where access to such locations is restricted, Users must not allow any unauthorised individual access to such locations for any reason.
- 7.2 All IT Systems not intended for normal use by Users (including, but not limited to, servers, networking equipment and network infrastructure) shall be located, wherever possible and practical, in secured, climate-controlled rooms and/or in locked cabinets which may be accessed only by designated members of staff or the directors.
- 7.3 No Users shall have access to any IT Systems not intended for normal use by Users (including such devices mentioned above) without the express permission of the directors. Under normal circumstances whenever a problem with such IT Systems is identified by a User, that problem must be reported to the directors. Under no circumstances should a User attempt to rectify any such problems without the express permission (and, in most cases, instruction and/or supervision) of the director and/or any appropriate third party/parties approved and appointed by the directors.
- 7.4 All non-mobile devices (including, but not limited to, desktop computers, workstations and monitors) shall, wherever possible and practical, be physically secured in place with a suitable locking mechanism. Where the design of the hardware allows, computer cases shall be locked to prevent tampering with or theft of internal components.
- 7.5 All mobile devices (including, but not limited to, laptops, netbooks, tablets, PDAs and mobile telephones)

provided by the Company should always be transported securely and handled with care. In circumstances where such mobile devices are to be left unattended they should be placed inside a lockable case or other suitable container. Users should make all reasonable efforts to avoid such mobile devices from being left unattended at any location other than their private homes or Company premises. If any such mobile device is to be left in a vehicle it must be stored out of sight.

7.6 The Company shall maintain a complete asset register of all IT Systems. All IT Systems shall be labelled and the corresponding data shall be kept on the asset register.

## 8. Access Security

8.1 All IT Systems (and in particular mobile devices including, but not limited to, laptops, netbooks, tablets, PDAs and mobile telephones) shall be protected with a secure password or such other form of secure log-in system as the IT Department may deem appropriate. Such alternative forms of secure log-in may include fingerprint identification and facial recognition.

8.2 All passwords must, where the software, computer or device allows:

8.2.1 be at least eight (8) characters long;

8.2.2 contain a combination of upper and lower-case letters and numbers;

8.2.3 be changed at least every 90 days;

8.2.4 be different from the previous password;

8.2.5 not be obvious or easily guessed (e.g. birthdays or other memorable dates, memorable names, events or places etc.); and

8.2.6 be created by individual Users.

8.3 Passwords should be kept secret by each User. Under no circumstances should a User share their password with anyone other than the directors. No User will be legitimately asked for their password by anyone at any time and any such request should be refused. If a User has reason to believe that another individual has obtained their password they should change their password immediately and report the suspected breach of security to the directors.

8.4 If a User forgets their password, this should be reported to the directors. The directors will take the necessary steps to restore the User's access to the IT Systems which may include the issuing of a temporary password which may be fully or partially known to the directors or any third party/parties approved and appointed by the directors that are responsible for resolving the issue. A new password must be set up by the User immediately upon the restoration of access to the IT Systems.

8.5 All IT Systems with displays and user input devices (e.g. mouse, keyboard, touchscreen etc.) shall be protected, where possible, with a password protected screensaver that will activate after not more than one minute of inactivity. This time period cannot be changed by Users and Users may not disable the screensaver. Activation of the screensaver will not interrupt or disrupt any other activities taking place on the computer (e.g. data processing).

8.6 Users may not use any software which may allow outside parties to access the IT Systems without the express consent of the directors. Any such software must be reasonably required by the User for the performance of their job role and must be fully inspected and cleared by the directors.

## 9. Data Protection

9.1 All personal data (as defined in the Data Protection Act 1998 and the EU General Data Protection Regulation) collected, held and processed by the Company will be collected, held and processed strictly in accordance

with the provisions of the Data Protection Act 1998, the EU General Data Protection Regulation and the Company's Data Protection Policy.

9.2 All Users handling data for and on behalf of ECS Resource Group shall be subject to, and must comply with, the provisions of ECS Resource Groups Data Protection Policy.

## 10. Internet and Email Use

10.1 All Users shall be subject to, and must comply with, the provisions of the Company's Internet, Email and Communications Policy when using the IT Systems.

10.2 Where provisions in this Policy require any additional steps to be taken to ensure IT security when using the internet or email over and above the requirements imposed by the Internet, Email and Communications Policy, Users must take such steps as required.

## 11. Reporting IT Security Breaches

11.1 All concerns, questions, suspected breaches or known breaches shall be referred immediately to the directors.

11.2 Upon receiving a question or notification of a breach, the directors or the Data Protection Officer shall, within 48 hours assess the issue including, but not limited to, the level of risk associated therewith, and shall take any and all such steps as the directors and/or the Data Protection Officer deem necessary to respond to the issue.

11.3 Under no circumstances should a User attempt to resolve an IT security breach on their own without first consulting the directors and/or the Data Protection Officer. Users may only attempt to resolve IT security breaches under the instruction of, and with the express permission of, the directors.

11.4 All IT security breaches, whether remedied by the directors or a third party approved and appointed by the directors, or by a User under direction, shall be fully documented.
