

# MORSON BIM BUILDING THE FUTURE

**Morson:** The UK's No.1 Technical Recruiter

## Our expertise

- Combining the experience of our aerospace and automotive teams, the expertise of our sister company Morson Projects, and our longstanding reputation in the infrastructure market, we are able to offer:
- Experienced, knowledgeable teams with a detailed understanding of BIM
- Access to a strong candidate network of BIM 'compliant' skills
- Training guidance for candidates, enabling them to meet the needs of the industry
- Upskilling opportunities through our training courses

## MORSON: your BIM recruitment partner

As a leading recruitment agency within the nuclear, rail and construction sectors, our role within the supply chain is to ensure we can source candidates with the correct BIM expertise.

Our teams specialise in core infrastructure sectors. Our experience ensures that we have the networks and market reach to source candidates both specifically trained in BIM, and those requiring upskilling or further training.

We also take BIM recruitment advice from other industry sectors within our business. For example, the aerospace and automotive industries have been working to BIM-similar processes for more than 15 years, and understand the modelling tools, collaborative working methodologies and data drop processes required for successful project completion. Through this expertise, we understand the necessity for BIM trained professionals and the key attributes to look for. This has helped us to better understand the candidate market, to more accurately target our attraction strategies and to build a talent pool of BIM skilled candidates.

# Morson's BIM offering

Our offering around BIM covers 4 key aspects:

## AWARENESS GENERATION

We are working with our clients and contractors to generate awareness of BIM best practice, with the support of our sister company Morson Projects.

## CROSS SECTOR

We use our experience and knowledge of BIM best practice within the aerospace and automotive industries to inform and improve the processes used on infrastructure projects.

## KNOWLEDGE SOFTWARE SKILLS

We are familiar with a range of software applications (including Catia, Aveva, NX, Solidworks, Navisworks, Revit and AutoCAD) and can support our clients through recruitment of individuals with specific software experience.

## MORE THAN DESIGN

We promote the use of BIM to include ongoing facilities and site management – extending BIM programmes beyond the initial project design phase.

Morson Group has experience operating at all BIM levels via our sister company Morson Projects; a design, engineering and project management business. This includes:

- 0A - Representation, manual 2D
- 0B - Representation, CAD 2D
- 1A - Representation 3D
- 1B - Representation intelligent 3D
- 2A - Prototype one way
- 2B - Prototype two way
- 3A - Full information capture local server
- 3B - Full information capture web serverD

We are also experienced working to the following D levels:

We employ engineers covering all BIM levels:
