

## **CORPORATE SOCIAL RESPONSIBILITY POLICY**

### **INTRODUCTION**

Signify Technology always considers its economic, social and environmental impact in its day to day operations.

We don't see corporate social responsibility as a duty or a burden, we see it as an opportunity to give back to the community at the same time as doing something good, fun and right.

### **ENVIRONMENT**

Signify Technology is committed to minimising environmental impacts in our day to day operation.

We aim to reduce our consumption of resources, ensuring that environmental topics are considered in the procurement of our goods and services.

Signify Technology aims to reduce the carbon footprint, prevent pollution and manage the waste that is generated by the business by re-using/recycling and using eco-friendly solutions.

To ensure that we are abiding to this policy, we communicate internally about the importance of environmental issues, work together to promote environmental performance and encourage feedback from our employees on how we can promote and improve this policy.

### **LOCAL COMMUNITY**

At Signify Technology we always aim to give back to the community and support where we can. This includes working with and supporting local and national charities, encouraging volunteer work in the local community and supporting local schools.

We are always looking for ways to contribute to making the world a better place.
