

Planning a Career Comeback? Here are Tips to Get You Started

#1

Networking

This can be frightening at first but change your tact – connect without the intent of requesting a favour; instead find a common ground.

#2

Apply the 10 rule

Network for 10 minutes and reach out to 10 people each day when actively searching.

#3

Leverage your online profiles

Such as LinkedIn, Industry groups, Upwork, etc.

#4

Create a Support System

Communicate with people around your job search goals. This can be a combination of:

- People who know your target industry
- A social connector who knows a lot of people and can help connect you
- An influencer who can put in a good word about your work
- A mentor who you can bounce ideas off and learn from
